# THE 2019+ FORD RANGER RAMBLER

DESIGNED & BUILT BY APG

This mighty midsize truck packs a punch. Our RAMBLER upfit takes it one step further with a carefully selected combination of aesthetic and performance upgrades. A true carbon fiber wide body gave our long travel suspension and 35" tall tires all the space it needs to articulate over the obstacles and elements, and when paired with our customized King Shocks your Ranger will have 12 1/2" of suspension travel. Our proprietary body panels are designed and manufactured in California and made of 100% aerospace grade carbon fiber, this makes our Ranger Rambler 10 inches wider than stock. APG manufactures and designs 100% of our parts in USA from RAW materials and is proud of it.

**ENGINEERED FOR MAXIMUM OFF-ROAD PERFORMANCE,  
WITHOUT SACRIFICING ON-ROAD DRIVABILITY.**
